

**Lastra lamp,
Rona M. Koblenz,
RMK Design**

Lastra is a sustainable table light made using high-flux LED technology integrated in to a specially designed printed circuit board that enables the white LED to perform at its highest standards.

**Beryl and Friends lamps,
WEmake**

WEmake rescue lamps and shades that have fallen out of favour, and rewire and refit them with low-energy bulbs before lovingly preserving them in a shrink-wrapped jacket. This process magically reinterprets the original aesthetic while leaving the original light fully functional to be revived at some future date.

**Prepay Lamp,
Jethro Macey**

Turned on for a fixed amount of time by a coin-operated switch, Prepay Lamp heightens awareness of electricity consumption while encouraging you to save your cash.
